For Immediate Release

W-L Introduces New 355RR Roundup Ready® Alfalfa for 2006 Planting

September, 2005 – W-L announces the release of new **WL 355RR (FD4), Roundup Ready® alfalfa** for planting in 2005-2006.

This new product combines very high yield potential, superior forage quality, and long stand life with outstanding tolerance to Roundup® non-selective herbicide. **HYTEST® SEEDS** distributes premium WL Alfalfa varieties through Independent Dealers across the U.S.

WL 355RR

- **Excellent tolerance to Roundup non-selective herbicide.**
- **Very high yields under 3-, 4-, and 5-cut harvest managements.**
- **Superior digestibility produces more milk or beef and greater profitability when fed.**
- **Very winter hardy (WH=1.8); WL 355RR delivers long stand life even on your toughest soils.**
- **“Perfect” disease resistance index (DRI) of 30/30 and strong resistance to insects and nematodes produces fast stand establishment and high yields.**
- **Very rapid recovery after cutting (FD=4) and superior standability encourages intensive harvest management.**
- **Well-adapted across the U.S. for hay and haylage uses where fall dormancy 4 varieties are managed.**

The Benefits of the Roundup Ready® Alfalfa Weed Control Program

Planting **WL 355RR** and utilizing the Roundup Ready® weed control program provides many benefits over conventional herbicide programs:

- ***Unmatched weed control*** at both stand establishment and in established stands means fewer weeds and higher quality hay and haylage.
- ***Superior crop safety at all growth stages*** with the Roundup Ready® system delivers higher yields in both the establishment year and subsequent years.
- The simplicity of using a single herbicide (Roundup) provides superior weed control with no need to tank-mix; ***one herbicide does it all.***
- ***Flexibility in timing of application*** allows growers utilizing the Roundup Ready® system to spray when necessary; ***no carryover or crop rotation limitations.***
- Minimal wait (*5 days*) before grazing or feeding.
- The Roundup Ready® alfalfa weed control program delivers ***significantly lower per acre weed control costs over the life of stand*** when compared to conventional herbicide programs.

HYTEST SEEDS offers a diverse portfolio of industry leading genetics and the latest technology traits delivering top-performing, high quality row crop and forage seed products, including corn for silage and grain, soybeans, grain sorghum, sorghum forage, wheat sunflower, canola and premium WL alfalfa.
