**California Dairyman wins
30 bags of HYTEST seed corn**

April 14, 2006: William Longfellow of Hanford, CA, has been randomly selected as the winner of 30 bags of HYTEST seed corn in a drawing sponsored by HYTEST SEEDS.

Longfellow, who is a Land O' Lakes shipper and milks around 820 cows and grows nearly 800 acres of silage corn, will have the opportunity to work with the local HYTEST SEEDS Product Specialist to select the HYTEST hybrid(s) of his choice containing the Roundup® Ready 2 corn trait best suited for his operation.

HYTEST Seeds offers a broad selection of high yielding, high digestibility corn silage hybrids with the Roundup Ready 2 corn trait, and genetics proven to fit a variety of soil types and management strategies. HYTEST corn hybrids containing the Roundup Ready 2 corn trait have been shown to reduce production costs and increase yields over conventional corn herbicide programs.
