

Exceptional Yield, Superior Forage Quality, and  
Outstanding Grower Value in

# New Roundup Ready® Alfalfa

# WL 355 RR

## WL 355 RR Advantages:

- Excellent tolerance to Roundup® non-selective herbicide.
- Very high-yielding under 3-, 4- and 5-cut harvest managements; outstanding productivity across a wide range of soil types.
- Superior digestibility produces more milk or beef and greater profitability when fed.
- Very winterhardy (WH=1.8); WL 355 RR delivers long stand life even under the toughest weather conditions.
- A "perfect" disease resistance index (DRI) of 30/30 and strong resistance to insects and nematodes produces big yields and long stand life.
- Very fast recovery after cutting and superior standability encourages intensive harvest management; WL 355 RR produces higher yields and higher quality forage more often with less risk.
- Dark green, fine-stemmed, and highly palatable.

## Planting WL 355 RR and utilizing the Roundup Ready weed control system provides many benefits vs. conventional herbicide programs:

- Unmatched weed control at both stand establishment and in established stands means fewer weeds and higher quality hay and haylage, resulting in more milk and beef per acre.
- Superior crop safety with the Roundup Ready system provides increased yield potential in both the establishment and subsequent years.
- The simplicity of using a single herbicide (Roundup) provides superior weed control with no need to tank-mix; one herbicide does it all.
- Flexibility in timing of application allows growers utilizing the Roundup Ready system in alfalfa the ability to spray when necessary; no crop rotation limitations.

# WL 355 RR

■ Area of Primary Adaptation

## WL 355 RR Delivers High Yields!

Outstanding yield potential, exceptional winterhardness, and superior feed value make WL 355 RR the alfalfa variety of choice for dairy, beef, and cash hay producers looking to maximize production and profitability in their operations while utilizing the benefits of the Roundup Ready weed control system.

## WL 355 RR vs. the Competition

The outstanding benefits of the Roundup Ready weed control system vs. an unsprayed conventional variety are shown here (Spring seeded).

## Agronomic Traits

Maturity	Early
Fall Dormancy	4.0
Winterhardness	1.8
Forage Yield Index	Very High
Digestibility/Feed Value	Superior
Persistence Index	Very High
Disease Resistance Index	30/30
Recovery After Harvest	Very Fast
Standability	Excellent

## Pest Resistance Traits

Bacterial Wilt	HR
Fusarium Wilt	HR
Anthraco	HR
Phytophthora Root Rot	HR
Aphanomyces Root Rot	HR
Verticillium Wilt	HR
Leaf Disease	R
Aphids	R
Nematodes	R

HR = Highly Resistant R = Resistant
