

More Tons, Higher Hay Quality, and
Exceptional Grower Value in

New Roundup Ready® Alfalfa

WL 660 RR

WL 660 RR Advantages:

- Excellent tolerance to Roundup® non-selective herbicide.
- Winter-active, very nondormant FD=9.
- Highly resistant (HR) to all major aphid pests.
- Highly resistant/resistant to all major nematode pests.
- WL 660RR demonstrates strong potential to deliver higher feed intake, improved milk production, and greater profitability when fed.
- Ideal FD=9 variety for the cash hay producer: WL 660RR consistently produces big yields of leafy, fine-stemmed hay with high %TDN.
- Outstanding persistence and long stand life even under intensive cutting schedules.
- Very strong disease resistance package (including HR to Phytophthora Root Rot and Fusarium Wilt) promotes fast seedling establishment and long stand life.
- Excellent tolerance to leaf diseases delivers improved leaf retention, higher protein levels, and greater %TDN.

Planting WL 660 RR alfalfa and utilizing the Roundup Ready weed control system provides many benefits over conventional herbicide programs:

- Unmatched weed control at both stand establishment and in established stands means fewer weeds and higher quality hay and haylage, resulting in more milk per ton fed and higher %TDN when tested.
- Superior crop safety at all growth stages with the Roundup Ready weed control system delivers increased yield potential in both the establishment year and subsequent years.
- The simplicity of using a single herbicide (Roundup) provides superior weed control with no need to tank-mix; one herbicide does it all.
- Flexibility in timing of application allows growers utilizing the Roundup Ready system to spray when necessary; no carryover or crop rotation limitations.
- Minimal wait (5 days) after Roundup application before haying/feeding.

WL 660 RR

■ Area of Primary Adaptation

WL 660RR Delivers Exceptional Value!

Outstanding yield potential and superior feed value make WL 660RR the variety of choice for cash hay and dairy producers looking for an FD=9 alfalfa that maximizes production and profitability in their operations while utilizing the breakthrough benefits of the Roundup Ready weed control system.

WL 660RR Yields More Tons

The outstanding benefits of the Roundup Ready alfalfa weed control system vs. an unsprayed conventional variety are shown here.

Agronomic Traits

Fall Dormancy	9
Winter Activity	Very High
Forage Yield Index	110%
Digestibility/Feed Value	Superior
Hay Quality (%TDN)	Excellent
Persistence Index	Very High
Aphid Resistance Index	15/15
Recovery After Harvest	Very Fast
Wet Soil Tolerance	Excellent
Traffic Tolerance	Very Good
Standability	Excellent

Pest Resistance Traits

Spotted Alfalfa Aphid	HR
Pea Aphid	HR
Blue Alfalfa Aphid	HR
Phytophthora Root Rot	HR
Fusarium Wilt	HR
Verticillium Wilt	MR
Anthracnose	MR
Stem Nematode	HR
Root Knot Nematode (southern)	R

HR = High Resistance MR = Moderate Resistance R = Resistance
